Profile

With over 15 years in tech, my career began unconventionally—starting in civil engineering, shifting to graphic design, and evolving into full-stack software development and DevOps. While working as a designer in Boston, I discovered programming by automating creative workflows. What began as a tool became a passion.

After a decade in development, I naturally transitioned into DevOps and cloud infrastructure. A personal experience with cyberattacks pushed me to specialize in **cybersecurity**, and I now share insights through technical blogs on **DevSecOps**, **cloud security**, and **automation**.

Having lived and worked in **Taiwan, the US, and France**, I bring a global, adaptable mindset to every project—combining **technical depth** with **cultural perspective**.

DevOps & Infrastructure Expertise

- **CI/CD & Automation:** GitLab CI/CD, GitHub Actions, Jenkins (basic-level), Terraform, Ansible
 - **Cloud Platforms:** AWS (EC2, S3, Lambda), GCP (GKE, Compute Engine), OVH Cloud
 - **Containerization & Orchestration:** Docker (multi-project), Kubernetes (GKE), Helm
 - **Monitoring & Observability:** Grafana, custom dashboards, uptime >99.9%, HDS compliance
 - **System Administration:** Linux servers (OVH, AWS), Bash scripting, system hardening
 - **Networking & Security:** OAuth2, Hash encryption, penetration testing, ISO 27001
 - **Programming & Scripting:** Go, Node.js, PHP, Shell (Bash), Python (entry-level with certification)
 - **Version Control & Collaboration:** Git (Advanced), GitHub, GitLab, Agile/Scrum workflows
 - **Infrastructure as Code:** Terraform, Docker Compose, Kubernetes YAML
-

Professional Experience

Budhapp — Senior Software & DevOps Engineer

Sep 2024 – Present | Hybrid

- Led deployment of a **cloud-native medical platform** with **blockchain transparency** and **containerized services**.
 - Implemented **CI/CD pipelines** with GitLab + Terraform, automating deployment to **Google Kubernetes Engine**.
 - Created custom **Grafana dashboards** for system metrics, boosting uptime and response time.
 - Introduced **LLM-based automation** for service scaffolding and architecture generation.
 - **Tech Stack:** Go, GCP, Kubernetes, Terraform, Docker, PostgreSQL, Bash, Grafana
-

Groupe Itekcom — DevOps R&D Engineer

Jun 2023 – May 2024 | France

- Integrated DevOps practices into e-health platforms, deploying **CI/CD pipelines**, managing **AWS HDS infrastructure**.
 - Maintained **compliance standards (HDS, ISO 27001)** through secure server configurations and automated audits.
 - Used **Grafana** for uptime monitoring and incident response.
 - Built **secure transmission modules** using OAuth2 and encrypted token authentication.
 - **Tech Stack:** PHP, Symfony, AWS EC2, GitLab CI/CD, Docker, Linux, Bash, Grafana
-

Livmed's — Full Stack & DevOps Engineer

Mar 2023 – Jun 2024 | France

- Migrated backend to **TypeScript** and introduced **modular APIs** for real-time delivery integrations.
 - Built **WebSocket microservices** and **optimized Google Maps API usage**, reducing cost by 25%.
 - Implemented **CI/CD with GitHub Actions** and mentored interns on DevOps best practices.
 - **Tech Stack:** Node.js, MongoDB, AWS S3, Angular, Firebase, Docker, GitHub Actions
-

Big Boss Nice — Backend Developer (DevOps Contributor)

Aug 2021 – Jun 2022 | France

- Designed and deployed a **GraphQL-based backend**, with **Docker-based deployment workflows**.
 - Built RESTful services and managed **Git version control** and **CI pipeline integration**.
 - Participated in automated test setups and **containerized build environments**.
 - **Tech Stack:** PHP, Laravel, Docker, GitLab CI/CD, Node.js, MySQL, GraphQL
-

Freelance (Vacha) — Full Stack Developer & DevOps Consultant

Mar 2019 – Jun 2022 | France

- Created, deployed, and monitored multiple SaaS e-commerce sites using **AWS** and **Docker**.
 - Integrated chatbots and REST APIs and managed infrastructure deployments and monitoring.
 - Built mobile apps with **Angular/Ionic**, orchestrating backend **cloud deployments**.
 - **Tech Stack:** Laravel, Ionic, Node.js, AWS, WooCommerce, WordPress, Bash
-

Florihana — Lead Developer & Server Admin

Mar 2017 – Feb 2019 | France

- Refactored the e-commerce infrastructure on Prestashop and **enhanced server resilience** during traffic spikes.
 - Managed **Linux servers on OVH**, including backups, maintenance scripts, and performance tuning.
 - Integrated **SAP logistics** APIs and optimized load balancing for peak order flow.
 - **Tech Stack:** Prestashop, SAP, Linux Plesk, PHP, Bash, Joomla
-

Digital River — Web Backend Developer

Dec 2015 – Feb 2017 | Taipei, Taiwan

- Optimized backend (Java/JSP) for **global payment platforms** like Bethesda & HTC.
- Reduced page load times by 64% and minimized input errors with unit tests.
- Supported **global payment operations** for international clients.

- **Tech:** Java, JSP, JavaScript, SCSS, API Payment Systems
-

TutorABC — Team Lead Front-End

May 2015 – Dec 2015 | Taiwan

- Led front-end team of an **e-learning SaaS platform** with 25% performance gains.
 - Mentored junior developers and implemented design standards.
 - **Tech:** HTML5, CSS3, jQuery, ASP.NET, Bootstrap
-

YoWoo Technology — Front-End Developer

Jul 2014 – May 2015 | Taiwan

- Built **concierge and delivery system** interfaces for a real estate chain.
 - Used AngularJS and mobile hybrid tools for cross-platform delivery.
 - **Tech:** AngularJS, HTML5, LESS, jQuery, Ionic
-

Academia Sinica — Web Designer & Programmer

May 2012 – Apr 2014 | Taiwan

- Developed **conference registration systems** with improved UX and reach.
 - Created molecular visualizations used in academic publications.
- Tech:** HTML, CSS, PHP, Joomla, MySQL
-

Certifications

- **ISC2 Certification** – Cybersecurity, Apr 2025
- **Cybernin Certification** – Security, Mar 2025
- **Node.js Certification (Intermediate)**, Aug 2024
- **React Certification (Intermediate)**, Apr 2024
- **Python Fundamentals for Beginners** – Great Learning, Apr 2024
- **CS50 Computer Science** – Harvard University, 2012

In progress : Microsoft Certified: Azure DevOps Engineer Expert (AZ-400), Sécurité Pentesting (RS6092)

Education

- CS50x: Introduction to Computer Science – **Harvard**, 2023
- Introduction to Programming (Java) – **EPFL**, 2022
- Programming with Python – **Great Learning**, 2021
- Become a Web Mentor – **OpenClassrooms**, 2020
- BA & MA in Graphic Design – **Tunghai University, Taiwan**, 2004

Languages

- English – Professional
- French – Professional
- Japanese – Fluent (N1)
- Chinese (Traditional, TW) – Native

Other Skills

- Agile Methodologies: **Scrum, MVP delivery, Team mentoring**
- Documentation & Specs: **Clean Architecture, API Contracts, TDD**
- AI Tools: **ChatGPT, Claude 3.5**, automation scripting
- Blockchain: **Smart Contracts, Ethereum, Polygon**

Availability

- Immediate | Hybrid or Fully Remote
- Open to DevOps / Infrastructure Engineering roles in international teams
